Submitted sir,

Sub:RWS&S-TDWSP- Vadoni 10KL clear water sump in Sirpur-U Mandal–Komarambheem Asifabad Segment-Adilabad District-Designs -Approval-Reg.

Kindly pursue the Designs of the following 10KL Clear Water sump at Aliguda 3 (V), Sirpur-U(M), submitted by the Executive Engineer TDWSP Asifabad Division, Adilabad district for approval.

1. 10KL Clear Water Sump.

The Executive Engineer TDWSP Asifabad Division has submitted Structural Designs & Drawings of 10KL Clear Water sump based on the field conditions and as per the estimate provisions, the structural designs & drawings for the above structure is verified with RWS&S standard Type Designs and submitted for approval.

The following design parameters were considered:

- Capacity : 10KL
- Net SBC of Soil : 10.0 t/sqm
- Grade of concrete & Steel : M 30 & Fe 500
- Dia of sump Inner to Inner : 3 .00m
- Sidewall Height : 1.90mts
- Sidewall Thickness: ~~150mm~~ 200mm *df*
- Top Slab thickness: 150 mm
- RaftSlab thickness: 200mm

As per the above parameters the structural design and drawings of the clear water sump is verified, as per similar Type designs available and approved by the RWS&S Department considering the SBC and type of soil, duly following IS codes, IS: 456-2000, SP:16, 34, IS:3370 and IS 1893-2002 (seismic codes).The sizes and steel proposed in the designs and drawings of all components are safe and sufficient.

The additional points noted after checking the designs are:

- Detailed Estimate of the Structure with these specifications has to be prepared and compared with the provision made in sanctioned estimate. Such that deviation if any is within authorized limits. If any deviations noticed, the Estimate should be submitted for obtaining approval from the Competent Authority.

Subject to approval a draft memo addressed to the EE, TDWSP Asifabad Division , for communicating approved Structure is put up for kind perusal and approval.

DESIGN CALCULATION

PROJECT TITLE

PROVIDING DRINKING WATER TO HABITATIONS
IN KOMARAMBHEEM ASIFABAD SEGMENT
IN ADILABAD DISTRICT (30 MLD WTP)

UNIT

10 KL SUMP

DCI NO: - LE150883-C-WS-RW-DC-1442
&
LE150883-C-WS-RW-NU-1443

PRINCIPAL CLIENT

RURAL WATER SUPPLY
AND
SANITATION DEPARTMENT,
TELANGANA

CONTRACTOR

L&T CONSTRUCTION
WATER & EFFLUENT TREATMENT SBG

DESIGN OF SUMP

BASIC DATA

Diameter = 3 m
Water depth = 1.6 m
Free board = 0.30 m

CAPACITY CHECK

Required capacity = 10 KL

Capacity of suction

Clear diameter = 3 – 2 x plaster thickness
= 3 – 2 x 0.012
= 2.976 m

Water depth = 1.6 m

Volume = $(\pi * d * d / 4) * H$
= $(\pi * 2.976 * 2.976 / 4) * 1.6 = 11.13 \text{ m}^3$ (including dead storage)

Volume-Dead storage = 11.13-1.04 = 10.09

Net volume = 10.09 $\text{m}^3 > 10 \text{ m}^3$, hence O.K.

ELEMENT:

Inside tank: (1) Cylindrical wall
(2) Top Slab

SBC – 10 t/m²

GROUND WATER TABLE: NO GWT
